

Welcome to SYNOPTICS, a business unit of Northrop Grumman Aerospace Systems

SYNOPTICS offers its customers:

- ❖ Industry leader in the manufacture of solid-state laser materials and components
- ❖ Expertise in Czochralski, Hydrothermal and Liquid Phase Epitaxy (LPE) growth techniques
- ❖ Advanced crystal growth Research and Development (internal and external)
- ❖ Diverse fabrication skills in all facets of crystal fabrication from growth, cutting, drilling, grinding, polishing, thin film deposition, and inspection
- ❖ Highly talented and experienced manufacturing, measurement, and engineering support to ensure the highest quality standards are met
- ❖ World-wide staff of sales representatives
- ❖ ISO 9001:2001 certified facility

We are truly a “one stop shop” for customer parts from material growth to final inspection and packaging. Our commitment is to provide high-quality products which meet stringent performance requirements while at the same time simplify and improve customers’ supply chain management.
